

- A screenshot of the answers to the pre-lab multiple choice questions (if any), as follows:

**Your answers:**

Q-1	Q-2	Q-3
B	A	B

*Take the screenshot only for the table using (cmd + shift + 4 on Mac) or (win + shift + s on Windows).*

- Answers for ANY essay, short answer, fix errors, etc. questions.
- Screenshots for all the activities that requires you to write a code and/or show some output.

```
lab7 > 1.py > ...
1  values = [1, 2, 3, 4, 5, "hello", 6, 7, 8, 9, "10"]
2
3  try:
4      for cur in values:
5          print(cur)
6          if type(values[cur] == str):
7              raise ValueError("String found in list")
8  except ValueError as e:
9      print(e)
10 finally:
11     print("Done")

~/CS1026/lab7/1.py
/opt/homebrew/bin/python3 /Users/rohin/GitHub/CS1026/lab7/1.py
